Which Exam Should I Take?

Commercial applicators are those employed applying pesticides to customer's properties (i.e., those who apply pesticides for hire).

Public applicators are those employed by the state, a municipality, a public school district, or whose employer is funded by public money.

Private applicators are those who intend to purchase and apply restricted use pesticides to property they or their employer own or rent for the production of an agricultural commodity, including nursery and green house.

Core training and testing on pesticide safety and regulations is required for every certified applicator.

Category 6: Ornamental & Shade Trees

Required for applicators treating trees, shrubs and ornamental plants in residential and commercial landscapes.

Category 7: Lawn & Turf

Required for applicators treating lawn and turf areas.

Category 10: Rights of Way and Weeds

Required for applicators controlling vegetation on rights-of-way, roads and industrial sites, as well as landscapers who control weeds on sidewalks and driveways.

Category 23: Park & School Pest Control

Required for applicators applying pesticides in a campground or recreational area of a public or private park or on elementary or secondary school property.

Registration Cost:

*** BEST VALUE! ***
